An ingeniously unique rower that emulates a rowing movement pattern using adjustable bodyweight resistance, the ELEVATE Row™ produces a full body workout, integrating a strength component into a traditional cardio machine.

The Row targets all the muscles groups simultaneously and enables a smooth consistent load through the entire range of motion, due to loaded concentric and eccentric phases of the exercise.

1. Adjustable incline body resistance integrates strength with cardio.
2. Smooth consistent load through concentric and eccentric phases.
3. Built for multi-planar movement.
4. Low impact compression on the joints.
5. Folds compactly into upright position for easy storage.
